PRESS RELEASE

Upsized to 65K Servers Space, Biznet Data Center Engages Hewlett Packard Enterprise and Berca Hardaya Perkasa to Deliver A Full Set of IT Infrastructure Solution
Paving the Budget Friendly Ecosystem to Accelerate
Digital Transformation for the Industry

Jakarta, 3rd of February 2021 – Biznet Data Center, by early 2021, has launched their expansion of facility and services to meet the demands for digital transformation from various industries in Indonesia. As part of the Biznet group focusing on infrastructure as a service and data center facility, this expansion step boosts service capacity to pursue the significant demand hike of industrial transformations.

The expansion brought by Biznet Data Center includes the power capacity upgrade along with essential facilities for customers. Biznet Data Center has significantly increased its power capacity up to 3 times its previous one using two different PLN power sources and currently backed by 26 new UPS on the power supply level. This enhancement aims to improve the reliability and performance of its data center services. Besides, the capacity expansion includes the 3000 m2 extension of Data Center Hall space to reach in total 6000 m2 and adding its hosting capacity up to 1,600 server racks or approximately more than 65 thousand servers operating at the same time. On top of that, Biznet Data Center has obtained the Tier III Facility certification from Uptime Institute by 2020, advancing from its previous Tier III Design certification in 2014.

Dondy Bappedyanto, Director of Biznet Data Center and CEO of Biznet Gio Cloud, said, *"We are committed to improving the quality of the Data Center services to cater to multiple sectors of industry in Indonesia. The pandemic situation has triggered demands for more data center services over the year. We believe this upgrade initiative will push more accommodation when facing the huge demands for digital transformation. Besides our top benefit for having free inter Data Center links, we are also working to provide a full set of IT ecosystem with Hewlett Packard Enterprise (HPE) dan Berca Hardayaperkasa (BHp). By now, our customers will be able to design their infrastructure more effectively without having to sacrifice the legacy systems from a previous investment."*

At the moment, the additional benefit has been offered by Biznet Data Center for having inclusive interDC links to five Data Centers in Indonesia, including the OpenIXP, for free. This on-top facility is designated to accommodate a more flexible infrastructure management scheme that requires high availability.

Biznet Data Center and its strategic partners HPE and BHp are currently launching an integrated infrastructure solution by offering co-location packages bundled with the swift hardware provisioning (servers, storage, and switches). This program is to target the fast-growing industries with a full set of ecosystems for IT Infrastructure. Business players are enabled to transform with a lesser burden with no upfront investment cost. "Our strategic partnership with HPE and BHp, the technology provider principals and System Integrator of HPE products in Indonesia, is an approach to proactively delivering solutions for well-planned infrastructure. Also, to boost the customer's productivity by having cost-efficient standards for IT infrastructure management," added Dondy.

HPE's IT as a service solutions offer a pay-per-use model that is delivered through HPE GreenLake and will be part of Biznet Data Center's ecosystems. Hengkie Kastono, Managing Director of Hewlett Packard Enterprise Indonesia, said that, *"Hewlett Packard Enterprise welcomes our strategic partnerships with Biznet Data Center and Berca*

Hardayaperkasa, which will enable us to deliver solutions that will accelerate the digital transformation journeys of more industry players across Indonesia. By incorporating as-a-service solutions through HPE GreenLake into our offering, customers are able to free up more capital and boost their operational and financial flexibility with a pay-per-use consumption model."

This infrastructure solution also boldly arms with the hardware distribution from BHp force, ensuring the hardware delivery comes with warranty support to the customers*. "Berca Hardayaperkasa is committed to delivering the system integration support with the best service when providing IT product quality to outreach all customers aiming to accelerate their digital transformation on multiple sectors. BHp possesses a comprehensive solution to alleviate the customer to innovate their business in the disruptive era,"* said Bintoro Yuwono, President Director of PT Berca Hardayaperkasa.

Since 2001, Biznet Data Center has served multi-industrial sectors, from e-commerce, banking to the government, and supported by the Cloud Computing service of Biznet Gio, which just obtained SOC Type-2 certification to reinforce their security management certification of PCI-DSS and ISO 27001. The cloud service is also part of the ecosystems offered which customers have the options to plan the disaster recovery scheme from co-location to the cloud or vice versa.

Through the strategic partnership with HPE and Berca, Biznet Data Center will continuously offer the integrated solutions to many cities throughout Indonesia as a one-stop integrated infrastructure solution and hopefully covering completely for all infrastructure needs from the growing industries. Onto the next phase, the grand plan with Biznet will invoke Edge Computing/Data Center services and the new Cloud services for SMEs imminently. Biznet Data Center users will be powered by Biznet Network coverage in more than 110 cities to bring hassle-free digital transformation for all industries.

About Biznet Data Center
PT Dinamika Raya Prima is a data center service provider in Indonesia, owning and operating three (3) data centers located in Jakarta, West Java, and Bali. Since 2001, Biznet Data Center has focused on providing integrated, secure, scalable data center services to support Indonesia's data center service requirements. Biznet Data Center obtains Tier 3 by Design & Facility Certifications by Uptime Institute. Also, Biznet Data Center has obtained TVRA, ISO 270001, and PCI-DSS certifications, complying with security management standards to serve data-sensitive industries, including financial, health, e-commerce, and government sectors.
