

PRESS RELEASE

Biznet Becomes the Fastest Internet Broadband in Indonesia Based on Test Done by Speedtest

Jakarta, Indonesia, February 18, 2021 – Speedtest Intelligence recently announced and released a list of the fastest Internet broadband service providers in Indonesia, which was announced and posted through its webpage <https://www.speedtest.net/global-index/indonesia?fixed#fixed>, where Biznet was successfully placed its position in the top spot as the fastest Internet broadband with the highest score, at 33,99.

The list of the fastest Internet broadband service providers in Indonesia was released by Speedtest based on its Internet connection's speed testing in Indonesia, which was conducted by Ookla for the period of Q3-Q4 2020. *"This has become an amazing achievement for us, following the hard work of our committed team to provide a fast and stable WiFi Internet service for our customers. The success of Biznet in becoming the number 1 provider with the fastest Internet speed based on this Speedtest testing will be an amazing motivation for our team to continue giving the best service for all customers,"* said Adi Kusma, Biznet President Director.

He also added, *"I would sincerely thank our loyal customers, business partners, colleagues, and also our media friends for being there always, supporting Biznet throughout the years, and for continue giving us valuable inputs to continue improving our service quality in the future."*

As an integrated digital infrastructure company in Indonesia, Biznet is committed to continue providing a fast and stable Wifi Internet connection to support the transformation of

digital era in Indonesia. As we all know, the on-going pandemic has forced everyone to carry out daily activities such as working, studying, shopping and much more, from home, which of course need to be supported by a reliable Internet connection that can accommodate all of those activities.

That is why Biznet is here with a fast and stable WiFi Internet, supported by **The New Biznet Fiber** network, where since 2018 Biznet has been upgrading our network with the latest technology, nationally. This network can answer the needs for bigger bandwidth capacity up to 5-10 years from now, especially to answer the increasing requirements from the use of video conference applications since the pandemic, which has become a new set of trend in the digital era.

Seeing the significant growth of digital technology, in 2021 Biznet is still focusing on expanding network coverage to more areas in Indonesia. In the beginning of the year, Biznet will focus on expanding coverage in more areas in DKI Jakarta, Bekasi, Tangerang, Tangerang Selatan, Denpasar-Bali, Sidoarjo, Surabaya, and soon will also be followed by other cities and districts in Indonesia. Currently, Biznet Fiber Optic network has reached more than 50,000 KM throughout Java, Bali, Sumatra, Batam, Kalimantan and Sulawesi, and has covered more than 110 cities and districts.
