

PRESS RELEASE

Biznet GIO Nusantara Launches Four New Services Offering The Best Business Solutions for Customers *Biznet GIO Backup, GIO Storage, GIO Bricks, and GIO Box Service*

Jakarta, 26 May 2016 – PT. Biznet Gio Nusantara (Biznet GIO), a joint venture between Biznet and Internet Initiative Japan Inc. (IIJ) officially launched its latest service, GIO Backup Service, a complete IT solution specially designed for business/corporate segment that offers technology features to restore and protect corporate data/server, including data center facility that will protect corporate data from any kind of disasters. Biznet GIO also launched its latest GIO Storage Service, a durable and highly scalable storage service that provides various REST API (Amazon S3 compatible) to store any amount of data. GIO Bricks is also being introduced as a platform, which will be the best solution for business, offering simple and quick setup to be deployed within minutes. Moreover, Biznet GIO also launched the new GIO Box, an online storage that can be accessed from any devices, which files can be synced and shared to anyone at anytime from anywhere.

GIO Backup

GIO Backup provides protection for critical corporate data based on the latest easy-to-operate technology, with maximum security, scalable, and reliable. GIO Backup offers pay-as-you-go service method, which can be applied without any minimum value or commitment. As the leading solution for business segment, GIO Backup offers various user-friendly features. Here are several main features offered by GIO Backup:

- **Anywhere Restore**
GIO Backup offers convenient ability for users to restore or backup data using any machines regardless any platform.
- **Centralized Management**
Users can manage data for both virtual and physical machine, and it can be done from one location where users can backup data, review the latest status and receive information about the data using only one console in one location.
- **Data Compressing**
With an integrated feature to compress and reduplicated data, backup data volume can be reduced up to 90%, which will optimize backup speed, reduce storage requirements, and minimalize network loads.
- **Data Encryption**
All backups will be automatically encrypted and transmitted over a safe AES-256 encrypted algorithm that has been approved by the Government.

“We understand that more companies require data backup technology or solution to ensure corporate data is stored securely, but still able to be easily accessed, so we could use the data immediately, not only using the device that are located inside the office but also using other devices located out of the office. Therefore, we decided to develop GIO Backup technology that is hoped to be the best solution for corporate data restore and management. Offered in an affordable price, corporations can still running company operations without worrying about the high budget for data management”, said Andre Jenie, VP Sales Biznet GIO Cloud.

GIO Backup is a multiplatform backup system applicable for Windows or Linux-based servers, and computers/laptop with Windows, Mac, or Linux OS. Moreover, GIO Backup Service also supports applications like Microsoft SQL, Microsoft Exchange and Windows System State, backup server for VMware and Hyper-V. All features offered by GIO Backup Service are specifically designed for business/corporate segment, providing solutions for several issues such as below:

- **Disaster Recovery**

GIO Backup has the best backup technology that can restore all data that are stored in the system with one easy step.

- **Remote Backups**

GIO Backup solution can be accessed from several locations but still mainly controlled by centralized management, giving an easy disaster recovery solution with easy-to-use backup technology.

- **Laptop and Desktop Backups**

GIO Backup provides comprehensive features that protect all working devices within a company.

GIO Storage

As a durable and highly scalable Cloud storage to store any amount of data, GIO Storage provides users with the suitable space to store large amounts of data at low and predictable cost. Users will only need to pay a usage-based fee with no minimum commitment and without any up-front cost. Moreover, users are able to store as much data as they require as there is no limitation for the space size. Users don't need to secure any extra resources for your future requirements.

Developed based on the latest technology and specifically designed to meet the demand for a flexible and cost-efficient data storage service, GIO Storage is the best solution for any data storage requirements. GIO Storage offers the best features that will be the most suitable service for data management, which include:

- **Backup and Archiving**

GIO Storage offers a highly durable, scalable, and secure storage for backing up and archiving your important data

- **Data Store for Big Data Analytics**

GIO Storage can be used as a big data object store with high scalability and flexibility. GIO Storage offers a solution to help users manage their big data by reducing costs. Scaling based on the users' demand.

- **Content Storage**

GIO Storage provides high durability with available storage for a variety of contents. It allows users to migrate their storage infrastructure into the Cloud, where they can take advantage of GIO Storage's high scalability and usage-based pricing to deal with their needs.

"Our young and dynamic team has never stopped developing ideas and technology to provide the best data storage service for all of our customers, ranging from corporate, SMB, individual and consumer segment. We are confident that GIO Backup Service and GIO Storage can be the best solutions for all customer segments", added Andre.

GIO Bricks

Biznet GIO Nusantara also introduces GIO Bricks, a platform that runs any Java, PHP, Ruby, Node.js, Python or .NET application. It also supports all available Docker images. A wide array of pre-packaged app-server and database choices provide the broadest range of application support with agile scaling. GIO Bricks will be the best solution for business, offering simple and quick setup so it can be deployed in a minute. It is a fully elastic server with automatic scale up and down within a single server and multiple servers depending on the actual traffic.

GIO Bricks will be the perfect solution for business, offering several advantages and features below:

- **Rapid Deployment**

GIO Bricks provides management flexibility with access to application and infrastructure configuration files through a simple UI

- **Agile Scalability**
GIO Bricks supports automatic vertical and horizontal scalability, allowing each application to use only those resources required at any time
- **App-aware Infrastructure**
Infrastructure interprets the exact resource consumption of each application and application container sizes can be kept to a minimum scaling
- **New or Legacy Apps**
There is no proprietary APIs to code, so legacy applications can be supported without change. Java, PHP and Ruby applications can be delayed in minutes and can immediately take advantage of seamless scalability and high availability
- **Enterprise-level Security**
Configuration errors are mitigated with automatic installs. Application and databases are isolated for maximum uptime and security
- **Compatibility/Support**
 - Java, PHP, Ruby support
 - Tomcat, TomEE, Jetty, Glassfish, Nginx, Elastic VDS, Apache
 - GIT, SVN, Zip, War, Maven
 - Eclipse, Netbeans, IntelliJ IDEA
 - SQL (MySQL, MariaDB, PostgreSQL, No SQL (MongoDB, CouchDB)
 - Pre-built Integrations with Industry-standard Tools and Applications

GIO Box

As an online storage that can be accessed from any devices, and the files can be synced and shared to anyone at anytime from anywhere, GIO Box provides large capacity storage at a very affordable price. The files are securely saved and can also be synced and shared safely.

GIO Box offers five features to provide users with reliable and secure data storage service:

- **Highly Reliable**
GIO Box is built on GIO Cloud that provides high reliability with top-of-the-line hardware and software and system redundancy
- **Unlimited Data Storage**
The service can be upgraded to unlimited storage if users subscribe to Biznet Wifi service
- **Secure Connection**
GIO Box encrypts users' files in transit with secured https connections
- **Synchronize Anytime Anywhere**
Users can use Mobile or Desktop Client to synchronize their favourite folders seamlessly with their GIO Box from anywhere at anytime
- **Share with People**
Users can share files with their team or anybody using links with some features like upload rights, passwords and automatic expiration.

Moreover, GIO Box is also offering special promotion offering 50GB free storage for the first 1000 accounts.
