

PRESS RELEASE

Watching Movies Online is Now Smoother with The Best Internet Connection from Biznet

Jakarta, 11 January 2016 - Internet has become one of the main necessities for everyone since it has become more accessible with many Wi-Fi networks available in more places and locations. With Wi-Fi, anyone can stay online using their smartphones or tablets anytime in many places including in their office, home, cafes, restaurants and other public facilities. In line with the fast growing Internet technology, the growth of OTT (Over The Top) contents that are based on attractive applications is also increasing, and Indonesia is indeed one of the biggest market since it has a huge number of population.

We have been seeing that the habit of people in using the Internet has been changing significantly, therefore bigger bandwidth capacity is also required. In the near future, Internet providers in Indonesia are encouraged to provide customers' satisfaction in watching movies and listening to music through an Internet network provided by OTT content providers, from both local and International.

"The habit of Internet users in Indonesia has been shifted in line with the development of Internet technology. Nowadays, we can do almost anything through our smartphones, just like the changes on the habit of people in watching TV. Now, most people spend more time watching TV, movies or music videos through smartphones or tablets by using Internet connection. We see this changes as a significant condition that can push Biznet to provide the best Internet connection so that all Internet users are no longer experiencing broken, lagging or buffering connections while watching movies or doing other activities online," said Adi Kusma, President Director Biznet Networks.

Now, Internet users can watch movies online through various OTT portals with a huge list of various movies from all over the world, which can be selected according to user's interest. As a solution to your needs to have the best Internet to watch movies online, Biznet provides Biznet Home service that offers bandwidth capacity starting from 10 Mbps with a price of Rp 200.000/month. By having this service, users can have more advantages to watch movies online with stable Internet connection without lagging or buffering.

Moreover, for you who spend more time outdoors, Biznet also provides Biznet Wifi service with unlimited bandwidth capacity, with a price starting from Rp 25.000/day to watch TV, movies or listening to music online. Biznet Wifi is available in public areas; cafes, public parks, restaurants and other public facilities.

To ensure Biznet service quality for all customers, Biznet keep expanding network in many more areas in Indonesia and International. Biznet Global Internet network is connected to 11 International links that spread over several major continents worldwide, making sure all customers have a reliable, fast and stable Internet service from Biznet.
