

PRESS RELEASE

Biznet is the Fastest Broadband Internet Provider in Indonesia, Based on Speedtest Q2 2021 Period

Jakarta, Indonesia, 21 Juli 2021 – Speedtest Intelligence, an Internet connection speed-testing platform, has recently released the updated list of the fastest Internet broadband service providers in Indonesia, which was tested and announced by Ookla for Q2 2021 period, and the list was posted on <https://www.speedtest.net/global-index/indonesia#fixed>, and Biznet successfully maintained its position in the top spot as the fastest Internet broadband with the highest score, 40.66 points.

“This achievement becomes the result of our commitment and also the solid cooperation of the entire Biznet team, for their positive performance in providing fast and stable Internet service for customers, since human digital life has become more convenient with the support from Internet technology in carrying out our daily activities. In line with our commitment to provide the best Internet service, we do hope that the achievements, that we successfully gained from the Speedtest test result for the Q2 2021 period, will be a great motivation for us to improve our service quality and provide the best services based on the latest technology and innovation for all customers,” said Adi Kusma, President Director Biznet.

Currently the Internet has become a major facility that needs to be available in every home. Nearly all activities, including working and studying, need to be carried out online from home, which depends on a good Internet connection. This encourages the increasing public demand for a faster and more stable Internet connection. This too, must be accompanied by the availability of a proper Internet network to meet people's needs for digital technology facilities in the digital era. Based on the current conditions as an integrated digital infrastructure company in Indonesia, Biznet is committed to continue providing fast and stable WiFi Internet service to support digital activities and developments in Indonesia.

Today, Biznet networks have been available in more than 110 cities along Java, Bali, Sumatra, Batam, Kalimantan and also Sulawesi with more than 50,000 KM of Fiber Optic Cable. Biznet also continues to expand its network to allow more Indonesians to experience fast and stable Internet services from Biznet, which are supported by The New Biznet Fiber network. Our support and operations team in the field are also properly prepared and trained to ensure all customers get the best service, both for the new installation and network troubleshooting process, so that all customers can continue carrying out their online activities at home smoothly.

“We would like to sincerely thank all of our loyal customers, business partners, colleagues and also our media friends for being there and for trusting Biznet the chosen Internet service provider that can support everyone’s digital activities. And we assure you that we are strongly committed to continue striving, maintaining, and improving the quality of our service for the satisfaction of all our customers,” said Adi Kusma.
