

PRESS RELEASE

18 Years in Taking Part to Build The Nation, Biznet Continues Making Innovations for the Future of Indonesia

Jakarta, 1 October 2018 – Biznet is celebrating its 18th anniversary today, a remarkable journey with numerous achievements in providing the best telecommunication, data communication, and data center services for the people of Indonesia. Since Biznet was established in 2000 until 2018, Biznet has been growing and developing into one of the leading telecommunication, data communication and data center provider companies in Indonesia. After 18 years of operation, Biznet has been proving its commitment to support the growth of Indonesia in order to compete with other developing countries in the world, by providing the best services that have been available in more than 100 cities, supported by more than 2,500 creative individuals in more than 70 branch offices.

“Our 18th anniversary marks our achievements for the last 18 years in taking part to support the growth of Indonesia, which also strengthens our commitment to work harder and try our best to expand our coverage area, as well as to improve our service quality in today’s fast-growing digital era. We will continue putting our best efforts to support the digital community in various aspects including economy, education, as well as lifestyle,” said Adi Kusma, President Director of Biznet.

In technology, changes are unavoidable. Technology will grow along the increasing demand for a fast and high-quality Internet connection from many people. As an Internet, communication, and data center provider company, Biznet is always on track of the changes in technology and always try new things for the future of Indonesia.

With a commitment to provide the best Internet service supported by modern infrastructure and reliable network for the people of Indonesia, Biznet is launching The New Biznet Fiber Network as a solution for people’s needs for an increasing capacity from time to time. Therefore, Biznet is launching The New Biznet Fiber Network consisting Terabit Core Router Network, Metro Ethernet 10G/100G Distribution Network, and GPON (Gigabit Passive Optical Network) Network that facilitate a much bigger bandwidth capacity to support customers requirements in the future. With Metro Ethernet 10G/100G Network, The New Biznet Fiber Network will be able to deliver services with bigger capacity and improved performance, supported by redundant and protected device systems. Metro Ethernet 10G/100G Network is using Metro Ethernet Ring design that provides auto protection when Fiber Optic Backbone cable is being cut off. This network also has huge capacity up to 100 Gbps.

While the advantages of GPON (Gigabit Passive Optical Network) is that this network uses protected network with full fiber to customers’ home or office location. This technology is also based on GPON network access technology that able to deliver services with capacity up to 2.5 Gbps. Moreover, Biznet recently announced that Biznet Fiber Java Bali network has been completed and ready to provide the best Internet service in more cities in Java and Bali.

Supported by The New Biznet Fiber Network, Biznet service comes faster with bigger capacity to support users’ requirements in the future. With all the support that we get from all of our customers, business partners and other related partners and vendors, Biznet is now available in more than 100 cities and more than 1,689 districts, and we will continue strengthening our commitment to expand our coverage area to more areas in Indonesia. The total length of our Fiber Optic network has reached 25,000 KM nationally. *“In 2019, we will add Biznet Fiber network to more cities in Sumatra, Kalimantan and Sulawesi, so more people can enjoy the best Internet connection from Biznet to support the growing digital activities,”* Adi added.

Biznet Digital Campaign

Biznet also support young generations in Indonesia to take part in supporting the growth of the nation, for the better future of Indonesia. Biznet efforts to support young generations are being executed through various channels, one of them is through a digital campaign called **#PakeBiznet**. #PakeBiznet campaign is a campaign that uses digital platform, highlighting stories of those who have been successful in using the Internet to develop their business, and give positive contributions for themselves as well as others. Biznet is also running a program that supports young and talented

Indonesian athletes, to inspire young generations to continue following their passion, to shine and bring Indonesia to International levels. Biznet is currently supporting several young Indonesian athletes that have successfully made Indonesia recognized internationally, including Gregorius Aldwin – Biznet Official Skateboarder, Made Utama – Biznet Official Surfer, and Dimas Pamungkas – Biznet Official MTB Rider.

Biznet Bali Beach Cleaning Campaign

One of Biznet's initiatives in terms of social activities is shown through Biznet Foundation, a foundation that specifically created by Biznet to run social programs and activities, for a better Indonesia. Biznet realizes that company has huge responsibilities to give positive contributions for the environment with major goals to support the development of our country for all the people of Indonesia.

One of the social programs being run by Biznet Foundation is called Biznet Bali Beach Cleaning Campaign. In running the program, Biznet is working together with The Government of Badung - Bali and environment lover communities in Bali to clean beaches from piles of garbage and trash. Biznet is providing a Beach Cleaning Tractor that is currently being used to clean many beaches in Bali. For more information about this program, visit www.biznetfoundation.com.
