

Biznet Technovillage, Home of The Next Generation Technology Companies

Cibubur, November 11, 2011- Presenting the latest innovation, Biznet Networks develops a high-tech and eco-friendly office area for 2 hectare located in Cibubur, West Java called Biznet Technovillage. The office area has a unique concept, environmental friendly and adopts a high technology that was designed by Indonesia's talented Architect, Andra Matin collaborated with the world's leading Landscape Architect, Denise Salinger from St. Legere Design International.

"We have a commitment to keep creating innovation, thus we are very proud to present our latest innovation, which is Biznet Technovillage. Built in a very strategic location that can be reached in only 45 minutes from Jakarta, all the buildings is also an eco-friendly building or Green Building. Not only that, 30 percent of the total landscapes are parks, water parks and open space" said Adi Kusma, Biznet Networks President Director in the midst of Topping Off Ceremony Biznet Technovillage that held at 11.11 am, in November 11, 2011.

Furthermore, Adi explained that every industry should be more concerned about the environmental issues. Most office buildings were built with few parks in the area and this has been one of the reasons why Biznet develops Biznet Technovillage as one of the strategic and comfortable office area.

"Biznet Technovillage is targeted for various levels of companies in research, telecommunication, media, banking and outsourcing industry that require the use of operational office, research centre, media production and back up facilities as well. I believe that with comfortable surroundings it will create conducive working environment and motivate the employee to have a positive thinking and produce fresh ideas" conveyed Adi when being asked about Biznet Technovillage target market.

Endang Sunarya, Biznet Networks Intercity Project Manager, added that beside the office buildings, Biznet Technovillage also has a complete Data Center facility with Tier-3 Classification. The location of this data center is only \pm 40 km from Jakarta, in compliance with the regulation from Indonesian Bank to every private and national bank to have back up server system 40 km minimum from the central office if it is based in Jakarta.
