

22 Years of Moving Forward in the Technology Industry, Biznet Launches Digital Health Laboratory for Indonesian People

Jakarta, 11 October 2022 – Biznet has been moving forward for 22 years to build modern Internet infrastructure in Indonesia by presenting a variety of the best Internet service options and the latest innovations to support various digital activities of the Indonesian people. During Biznet’s journey, Biznet continues to prove its commitment to improving services by expanding fiber optic network to more areas and cities in Indonesia. Until now, Biznet has more than **65,000 KM Fiber Optic**, with **1,700,000 Homepasses** spread across more than **180 cities** in **Java, Bali, Bangka, Batam, Sumatra, Kalimantan, Sulawesi, Flores and Timor Islands**. This achievement is certainly also supported by more than 3,400 creative individuals who have a shared spirit and goal to build Biznet in carrying out its mission to become an integrated digital infrastructure company in Indonesia.

"In this year, we have turned 22 years old, and have shown our achievements that are constantly moving forward as the leading Internet, IPTV, Data Center, and Cloud Computing network service provider in Indonesia. As we already know, currently the Internet has an important role in developments in the digital era, then we will continue to work hard to improve service quality by developing innovations and presenting the best digital infrastructure to create a digital society more productive, prosperous and literate in technologically," said Adi Kusma, President Director of Biznet.

As an integrated infrastructure company in Indonesia, Biznet is also faced with challenges and changes based on the increasing need of people for Internet services. Therefore, to support the improvement of future Internet network capacity, Biznet is currently in the process of building an undersea Fiber Optic cable network that will connect Java, Sumatra and Bangka Islands, with the name **Biznet Submarine Cable System (BNCS)**. This network is connected from Anyer (Java) – Kalianda (Sumatra) and Sungsang (Sumatra) – Muntok (Bangka) along approximately 100 KM. With the construction of this submarine cable infrastructure, it is expected that more people will be able to enjoy the best Internet connection from Biznet to support the growing digital activities.

integrated and of international standards. Of course, this is based on the people getting health services that are more evenly distributed throughout Indonesia, supported by digitized technology and automation from the initial stages of the examination to the results that can be downloaded digitally. This service is expected to be a *one-stop-service* for digital-based public health services and provide maximum health services for the future of the community to be better and happier. The rapid development of technology provides unlimited convenience for the whole people to know and learn about various aspects of life to be more efficient. *"The rapidly evolving technology trend is becoming more sophisticated and modern and 22 years is not a short time for us, to continue to move forward to present the latest innovation trends supported by the latest infrastructure. Because innovation is Biznet's DNA to continue to develop potential and work for the people of Indonesia in the digital era. Thank you to all Indonesian people for the support and loyalty given to us during the 22 years we have worked,"* concluded Adi.

At the age of 22 this year, Biznet continues to be motivated to be able to connect the Biznet Fiber network to all Indonesian people located in many islands, cities and areas in Indonesia. With the hope that more and more people can be connected by the Internet network without obstacles so that it can reduce the digital divide and can contribute to developing the potential of each individual and company.
