

## Biznet Launches Smart Internet WiFi, Providing Fast and Stable WiFi Connection in Every Corner of Your Home

**Jakarta, Indonesia, 20 May 2021** – Answering the increasing demand for a fast and stable WiFi Internet connection at home, Biznet introduces the **Smart Internet WiFi**, the latest technology innovation that provides high-quality WiFi Internet connection from Biznet, in every corner of your home. The technology is supported by TP-Link Deco M4 modem (3-pack/antenna), which is capable of transmitting WiFi signal to a larger area within a home to cover wider areas and more corners of the house, allowing users to access WiFi Internet connections from everywhere.

*"Internet has become a must-have facility at home. We can see that the demand for a fast and stable Internet connection is increasing significantly, especially since the pandemic started a year ago. It was caused by our activities that need to be done online including WFH and online school, which need a fast Internet connection at home. Therefore, Biznet introduces Smart Internet WiFi that can be the best solution for users to have more WiFi signal coverage at home, which allows customers to be connected from every corner of the house. Biznet is working together with TP-Link in providing TP-Link Deco M4 modem, which can maximize Biznet's WiFi connection at users' home,"* said Adi Kusma, President Director of Biznet.

As we all know, home Internet users often experience problems with their connection at home such as unstable Internet WiFi connection, since common home materials such as thick walls and wood, which potentially block the signal transmission, often block the signal. Smart Internet WiFi from TP-Link Deco M4 is specifically designed to be a convenient solution for home Internet users for the unstable WiFi signal at home, especially when the user is away the location of the router device.

This problem can be solved by adding a device that has the ability to transmit WiFi signal to all areas in the house. To provide Smart Internet WiFi, Biznet is supported by TP-Link in presenting TP-Link Deco M4, that is the only one signal amplifier device in Indonesia with 3 pack antenna that offers benefits such as:

- Mesh WiFi AC1200 Whole-Home Mesh Technology from TP-Link Deco M4 has WiFi connection speed up to 800 Mbps.
- More rooms at your home will be covered by WiFi network.
- 3 Antenna Units will be connected with one SSID or more. Enabling switching connections between rooms automatically.
- Can be connected to more than 100 gadgets or computers.
- Equipped with Bandwidth Management, Parental Controls, built-in Antivirus and Quality of Service (QoS) features.

*"TP-Link Indonesia are here to give solution for Indonesian consumers to have a better Internet experience. We are also sure that the partnership with Biznet through TP-Link Deco M4 product, can give the solution and answer people's demand for a fast and stable Internet connection,"* said Sterling Lee, Country Director TP-Link Indonesia.

As an integrated digital infrastructure company in Indonesia, Biznet will always try to understand and answer people's demand for a fast and stable Internet connection to support digital activities at home, especially in the digital era like today. Therefore, the presence of Smart Internet WiFi with modem device from TP-Link Deco M4 can be the best solution that gives convenience to the customers in accessing a better Internet WiFi connection at home.
